REASONS FOR ALLOWANCE

The instant invention is deemed to be directed to an unobvious improvement over the invention patented in U. S. Patent No. 5,816,134 to Takenaka et al. The improvement comprises a swash plate compressor with a shoe receiving face that has a central point located so as to deviate from a common plane, wherein the common plane includes the piston axis and the shaft axis for the purposes of preventing non-uniform abrasion of the piston and the inner circumferential surface of the cylinder bore.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

PRIOR ART

The patent to Takenaka et al. is cited for the showing of a shoe receiving face similar to applicant's but lacking a central point that deviates from the common plane of the piston axis and the shaft axis.

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consists of six patents.

Yokomachi et al. (6,422,129), Herder et al. (6,325,599), Ahn (6,260,469), Umemura (5,706,716), Terauchi (5,615,599), and Terauchi (5,140,903) are cited to show shoe receiving faces.
